

# Clinton Prairie School Corporation

---

## Chromebook Insurance Protection Plan

Students and parents will be responsible for corporation owned technology property that is issued to them, just as they are for other corporation owned items such as textbooks, calculators, athletic equipment, etc.

The school corporation recognizes that there is a need to protect the investment by both the corporation and the student/parent. The protection plan helps to cover costs if the device is accidentally broken or damaged. The cost of the optional protection plan is \$24 annually per device and is nonrefundable. While there is no cost for the use of the Chromebook, it is imperative that the Chromebook the student is issued be maintained and handled in a responsible way. A protective case is provided to every student and the Chromebook must be kept in this corporation provided case at all times.

The protection plan safeguards you against accidental damage. It does NOT cover loss, damage by flood/fire/intentional destruction. The protection program does not cover misuse, neglect, or intentional damage. Students will be responsible for the entire cost of repairs or replacement to the computing device damaged through student misuse, neglect, intentional damage, or loss and theft. In case of theft, an official police report will be required. More than two (2) damage events per year will be deemed neglect and not covered by this policy.
